The patented ENVICON fastening adapter can be used for the fixing of ENVICON membrane disc aerators or one-sided fixing of ENVICON membrane tube aerators.

Lower cost with yet easier installation is made possible by the novel ENVICON fastening adaptor. They are available for rectangular and round pipes with different dimensions (63-115 mm). By sparing working steps and material, cost savings of approx. EUR 3.00 per diffuser can be expected. The main technical advantage is the horizontal orientation and the equal height of all membranes.

For deposit only the adapters EBA 1 are delivered in single parts.
